

COMPONENTS AND SYSTEMS FOR OMRON INDUSTRIAL AUTOMATION

Representation of
OMRON Electronics,
spol., s.r.o.

ELTODO Ostrava, s.r.o.

provides business and technical representation of **OMRON Electronics, spol., s.r.o.** for the northern Moravia region. (www.omron.cz). **ELTODO Ostrava, s.r.o.** offers a complete range of the world's leading vendors for industrial automation components and systems.

Product range

1. Industrial relays

- Switchboard power relays
- Interface relays for slots
- Power relays

2. Low-voltage switching technology

- Contactor relays
- Contactors and mini-contactors
- Thermal over-current relays
- Motor starters

3. Relays for printed circuits

- Power and signal relays

4. Semiconductor relays

- Power and interface relays

5. Time relays

- Electronic time relays for panel or for DIN bar
- Digital time relays

6. Counters

- Preselection counters
- Other counters and timers

7. Push-button switches /indicators

- Switches for printed circuits
- Switchboard indicators, change-over switches and switches

8. Micro switches

- Basic micro switches
- Miniature micro switches

9. Terminal switches

- Security terminal switches
- Terminal switches for general use

10. Security components

- Security switches, gates and circuit breakers
- Security relay units and relays
- Security light curtains

11. Inductive and capacity switches

- Inductive approach sensors
- Capacity approach sensors

12. Connectors and cables for sensors

13. Photoelectric sensors

- Sensors for general use
- Sensors for special applications

Product range

	<ul style="list-style-type: none">• Reading of colours and colour signs• Optical fibre readers• Optical fibres for E3X-NA and E3X-DA-N amplifiers• Photomicrosensors• Sensors for measuring distances and thicknesses
14. Rotation angle sensors	<ul style="list-style-type: none">• Incremental sensors• Absolute sensors of swivel angle• Electronic camshafts
15. Liquid level switches	
16. Temperature regulators	<ul style="list-style-type: none">• Analogue regulators• Digital regulators
17. Power supplies	<ul style="list-style-type: none">• Single-phase power supplies• Three-phase power supplies
18. Evaluation units	<ul style="list-style-type: none">• Basic display units• Programmable display units and transducers
19. Frequency converters	<ul style="list-style-type: none">• Standard frequency converters• Vector frequency converters
20. Slave drives	
21. Programmable terminals	<ul style="list-style-type: none">• Alphanumeric terminals• Touch terminals
22. Programmable automatic machines	<ul style="list-style-type: none">• Programming SW for PLC• Intelligent relays• Compact programmable automatic machines• Modular programmable automatic machines
23. Distributed systems	
24. Systems for image processing	<ul style="list-style-type: none">• Industrial systems with contactless transmission
25. Authentication systems	<ul style="list-style-type: none">• Readers and writers for magnetic and chip cards
