

HS – 052 HISTORIC LIGHTING POLE

Type: HS - 052

Basic Information

The **HS – 052 Pole** is designed for attaching to historic lanterns for illumination of urban areas, castles and gardens to highlight their unique atmosphere.

Technical Description

The **modular system** allows multiple combinations so that the light and technical properties designed by the project are maintained and yet the aesthetic appearance is not disturbed. The pole is available in two lengths allowing direct mounting of a lantern. For fixing more lanterns, the pole can be furnished with an extender with a decorative cone and arms either 600 mm, or 900 mm long. Two up to four arms with lanterns may be mounted on a single pole. In the pole's foot, there is a space covered by a door where the pole electric equipment can be placed. The whole pole is cast-iron. The finish is carried out with synthetic coating tinted according to the customer's wish.

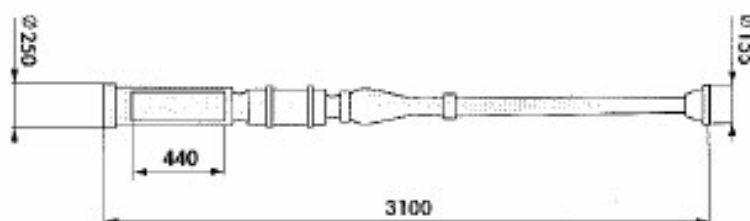

Cast-Iron Arms

600 mm arm
900 mm arm

Dimensioned Drawing

3,100 mm historic pole
