

Type: HS 02  
VYSEHRAD

## Basic Information

The **HS 02 VYSEHRAD historic pole** is suitable for ancient parts of cities, parks and gardens where it highlights their unique atmosphere.

The HL 052 VYSEHRAD historic lantern is a suitable accessory to the pole.

This type of pole combined with the lantern was used for the first time in the reconstruction of the Vysehrad historic district in Prague.

## Technical Description

The pole is **cast-iron**. The corresponding pole equipment can be placed in the pole foot. The finish is done with synthetic coating tinted according to customer's wish. As standard, the pole is supplied with the "anthracite grey" tint.

As per the customer's wish, the pole may be furnished with the heraldic device of a city district or a town. The pole is manufactured in two lengths: 3.1 and 3.9 m.

As an alternative, the pole may be equipped with a centre extender for fixing two, three, or four cast-iron arms 600 mm long.

The poles are mounted on an anchoring base concrete-cast in the ground. The anchoring base is not part of the pole.
