

Location

Barrandov – Prague 5

Basic Information

- This new garage compound consists of two independent separate six-floor buildings.
- The compound has been developed in the Barrandov residence area in connection with the development of a new tramway route as a replacement for the surface parking sites deactivation.
- Each building has its own entrance and exit being only accessible from the residential area through Lipskeho or Prazskeho streets.
- Both parts of the compound are equipped with an up-to-date parking facility, a camera system, and a central non-stop operated dispatching.
- The compound is primarily designed for residents' long-term parking.
- The total capacity of both facilities is 367 parking places.
